

Medical School for everyone!

You are cordially invited to attend the University of Colorado School of Medicine's Mini Med School. The 29th season begins this September 2018, running Wednesday nights for 8 weeks.

Thousands of Coloradans have attended this free program. It does not matter if you have never had a class in biology or science! Our best teachers will explain what our medical students are learning, in language that anyone can understand. Learn how your body works, in sickness and in health, and ask questions you may have. At the end, you will get a diploma. It will not let you practice medicine but will give you more confidence when talking to your health care providers and taking charge of your own wellness.

For more information, please go to:
